Profiles

LinkedIn
haley-mueller-331430139

Skills

Languages/Frameworks
C#, ASP.NET Core, .NET, LINQ, Entity Framework, MVC, CAD, AutoDesk Fusion

APIs/Auth
REST, OpenAPI/Swagger, OAuth2/OIDC, RBAC

DevOps
Git, GitHub, CI/CD (Azure DevOps/GitHub Actions), Docker, Linux, AWS, Google Cloud, Azure

Frontend/Mobile
HTML, CSS, JavaScript, jQuery, Bootstrap, Xamarin, Razor, Blazor

Observability
Logging, Metrics, Serilog, Log4Net

Data/Cache
SQL Server, MySQL, Redis

Interests

Hardware Development

Virtual Reality

Certifications

Microsoft Technology Associate (MTA)
March 2018
Microsoft

Summary

Senior .NET Backend Engineer | HRIS/Payroll Systems | Architect, Cloud Developer, Linux Enthusiast, AI Pair-Programming & Automation

Experience

TASC Remote
Application Engineer II February 2019 – May 2026

Architected, developed, and maintained HR web/mobile applications using ASP.NET Core, C#, Xamarin, MySQL, SignalR, jQuery, Bootstrap.
- Implemented employee time tracking, payroll processing, automated reporting, and multi-format file exports.
- Developed and consumed REST APIs; added real-time updates with SignalR.
- Scalable horizontal autoscaling api microservice with IPC shared memory

State of Missouri / Office of Administration Jefferson City, MO
Developer March 2018 – February 2019

Developed and maintained statewide public safety web applications using VB.NET, C#, SQL, HTML, Bootstrap, and jQuery.

Awards

MMC 2025: Misc Winner February 2025

Built multilingual messaging backend; enabled users to read/send messages across locales.
- Stack: ASP.NET Core, C#, REST APIs, MySQL.

Projects

Company API Backend

Designed REST API with 50+ endpoints for auth, employee management, permissions, and bulk operations.

- Implemented RBAC/permissions and integrated third-party services.

- Documented via Swagger/OpenAPI; secured endpoints and optimized common queries.

Stream Flow Platform

Live streaming automation platform that captures, processes, and archives broadcasts end-to-end.

- Captured stream lifecycle events, chat, redeems, and custom events in real time via SignalR/WebSockets, powering live overlays and Resonite in-game event automation.

- Automated post-stream pipeline: VOD download, transcoding, AI transcription/subtitles (Whisper), local LLM summarization (Ollama), and interactive replays with synced chat, event timelines, and word cloud analytics.

Education

State Technical College of Missouri Associate of Applied Science
Computer Application Development August 2016 – August 2018
